THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL)

ESTABLISHED 1902

INDEX TO VOLUME LXI

July to December, 1939

Head Office:
49, Wellington Street, London. W.C.2

Index to Volume LXI

SUBJECT INDEX

A

Abrasion, Specially-Hard Alloy Cast Irons for Resistance to, 23, 55.
Acid Open-Hearth Practice, Steel-Foundry, 255.
Acid Resistance of Vitreous Enamel, Recommended Method of Testing the, 395.
Air-Raid Shelters, Unit Construction of Cast-Iron, 366.
Alloy Cast Irons for Resistance to Abrasion, Specially-Hard, 23, 55.
Alloys by Melting, General Principles Applicable to the Compounding of, 151, 157, 165.
Alloys, Compounding of, 93, 151.
Alloys, Process of Crystallisation in Commercial, 99, 151.
Alloys used in Making Rubber Tyres, Metals and, 196.
Aluminium- and Zinc-Base Alloys, Pressure Die-Casting in, 8.
Aluminium Castings, Welding, 302.
Aluminium, Corrosion Avoidance in Cast, 264, 282.
American Foundry Industry, 230.
A.R.P., Factory Lighting and, 156.
A.R.P., Industrial and Commercial Lighting for, 326.

B

Basic Electric Practice for Steel Castings, 269, 289.
Basic Open-Hearth Practice, Steel-Foundry, 229.
Bearing Alloys, Recommendations for Three Leaded-Bronze, 135.
Bellfounders Turn Gunfounders, 302.
Bessemer Flame Control, 251.
Binders, Common Sense with Sand and, 78.
Blast Conditioning, 438.
Blast Volume for Cupola Operation, Optimum, 21, 144.
Brass Founders, Gypsy, 425.
Briquettes as a Substitute for Pig-Iron, 360.
British Cast Iron Research Association, Annual Meeting of, 324.
British Cast Iron Research Association, Annual Report of, 305.
British Foundry School, Diploma Pass List, 1938-9, 198.
British Foundry School, Fourth Annual Meeting of, 77.
British Non-Ferrous Metals Research Association, New Laboratories of, 3.
Bronze "C," New British Chemical Standard, 236.
Bronzes, Recommended Practice for Sand-Cast High-Lead, 273.
B.S. Specifications, Properties of Grey Cast Iron with Special Reference to the New, 199, 267.

C

Calcium Silicide to Cast Iron, Effect of the Addition of Molybdenum, Tungsten and Titanium together with, 265.
Carbon Nodule Size and Tensile Properties of Malleable Iron, Relation of, 234.
Cast-Iron Alloys, Wear-Resisting Nickel-Chromium, 228.
Cast Iron, Effect of the Addition of Molybdenum, Tungsten and Titanium together with Calcium Silicide to, 265.
Cast Iron, Elastic Properties of, 373, 393, 414.
Cast Iron for Enamelling, Views on, 11.
Cast Iron for Machine Construction, 334.
Cast Iron, New British Chemical Standard, 236.
Cast Iron, Preliminary Study of Gases in, 423, 443.
Cast Iron, Raw Materials for Making Low-Nickel, 439.
Cast Iron, Tinning, 194.
Cast Iron, with Special Reference to the New B.S. Specifications, Properties of Grey, 199, 267.
Cast Irons, Effect of Casting Temperature on the Primary Microstructure of, 321, 339, 356.
Cast Irons for Resistance to Abrasion, Specially-Hard Alloy, 23, 55.
Cast Irons, Thermal Conductivity of High-Duty and Alloy, 56.
Cast Irons in the Cupola, Melting Special, 359.
Casting by the Randupson Process, Producing a Large Iron, 169.
Casting Temperature on the Primary Microstructure of Cast Irons, Effect of, 321, 339, 356.
Casting, Welding a Special Alloy, 256.
Castings and the Nature of the Materials of the Melt, Relationship between the Quality of Iron and Steel, 125.
Castings by Calculation, Control of the Solidification of, 95.
Castings for Enamelling, 405.
Castings in Green-Sand Moulds, Large, 411.
Castings, Notes on Dry-Sand Practice for Steel, 103, 123.
Castings, Ornamental, 334.
Castings, "Rat-tailing" on Flat, 432.
Castings, Running Thin, 351.
Census of Production, Increased Scope of Questions for, 54.
Centrifugal Casting in Germany, Position of the Development of, 5, 30, 48, 55.
Centrifugal Casting of Metal and Alloys, 252.
Centrifugally-Cast Gear Blanks, 196.
Charcoal Iron Industry, 353, 398.
Chemical Standards, New British, 236.
Chilled Cast Rolls, Hardness Testing of, 320.
Chilled Rolls, Defects in Electrically-Melted, 57, 60.
Cleaning Hygiene, Metal, 429, 442.
Coke and the Cupola, Foundry, 249.
Compounding of Alloys, 93, 151.
Compounding of Alloys by Melting, General Principles Applicable to the, 151, 157, 165.
Compressed-Air Plant, Economical Operation of, 180.
Compressor Cooling Systems, Suppressing Scale Formation in, 408.
Control, Benefits of, 372.
Cooling Conditions in Ingot Moulds, 335.
Copper and Copper-Alloy Castings for Electrical and Thermal Conductivity Applications, 117, 140, 152.
Copper Market, American, 282.
Copper Situation, 38.
Copperhouse Foundry and Engine Works, 1819-1869, 342.
Core Plates, Non-Metallic, 282.
Core-Shop Control, 82, 388.
Cores Need Venting, Oil-Sand, 259.
Correspondence:—
Cupola Control, 74.
De-Enamelling by Caustic Soda, 398.
Corrosion and Means for Its Prevention, 136.
Corrosion Avoidance in Cast Aluminium, 264, 282.
Corrosion of Cast-Iron and Steel Pipes, Pitting-, 121.
Corrosion of Metals, 411.
Costing System, A French, 272.
Crankpin Wear Compared, 251.
Crucible Melting, Efficiency in, 217.
Crystallisation in Commercial Alloys, Process of, 99, 151.
Cupola and the Melting of Iron, 299, 367.
Cupola, Foundry Coke and the, 249.
Cupola Melting of Special Irons, 341.
Cupola Melting Practice, 283.
Cupola, Melting Special Cast Irons in the, 359.
Cupola Operation, Laws Governing, 41, 143.
Cupola Operation, Optimum Blast Volume for, 21, 144.
Cupola Refractories, Selection and Testing of, 63.
Cupolas, Practical Application of Monolithic Linings for, 385.
Cupolas, Prevention of Glare from, 248.
Cutting Tools for Cast Iron, 143.

D

Decarburisation of Granulated Pig-Iron: The "R.K." Process, 231.
Department of Scientific and Industrial Research, Cost of Work of, 92.
Designer and Foundryman, Co-operation between, 211.
Die-Casting Equipment, Action of Molten Zinc Alloys on Pressure, 276.
Die-Casting, Pressure, 258.
Die-Casting in Aluminium- and Zinc-Base Alloys, Pressure, 8.
Die-Castings, Design of, 409.
Drilling, Resistance of High-Silicon Malleable Iron to, 213.
Dry-Sand Practice for Steel Castings, Notes on, 103, 123.

E

Education and Training in Great Britain, Foundry, 184, 202.
Elastic Properties of Cast Iron, 373, 393, 414.
Electric Practice for Steel Castings, Basic, 269, 289.
Electric Tropenas Furnace for Alloy Steels, 448.
Electrical and Thermal Conductivity Applications, Copper and Copper-Alloy Castings for, 117, 140, 152.
Electrically-Melted Chilled Rolls, Defects in, 57, 60.
Electro-Metallurgy, Development in America of, 272.
Electrode Consumption in Electric Furnaces, Power and, 174.
Enamel Control, Investigation and Modern Ideas on, 13, 85, 186.
Enamel Plant, Workable Control Systems and Benefits to the, 238, 307.
Enamel, Recommended Method of Testing the Acid Resistance of Vitreous, 395.
Enamelling, Castings for, 405.
Enamelling Defects due to the Foundry, 312.
Enamelling Shop Troubles, 83.
Enamelling, Views on Cast Iron for, 11.

F

Feeding in Steel-Foundry Practice, Gating and, 218.
Ferro-Manganese, Melting Furnace for, 153.
Flame-Hardening of Cast Iron, 334.
Founders' Forum, 328, 338, 352, 369, 407.
Foundry Education and Training in Great Britain, 184, 202.
Foundryman, Co-operation between Designer and, 211.
Furnace for Alloy Steels, Electric Tropenas, 448.
Furnace for Ferro-Manganese, Melting, 153.
Furnace for Melting Malleable Cast Iron, Open-Hearth, 58, 79, 145.
Furnace Temperature, Automatic Control of, 237.
Furnaces, International Conference on Flames and, 81.
Furnaces, Power and Electrode Consumption in Electric, 174.

G

Gas Unsoundness in Metals, Effect of Melting Conditions on, 6, 9.
Gases in Cast Iron, Preliminary Study of, 423, 443.
Gating and Feeding in Steel-Foundry Practice, 218.
Gating of Castings, 116.
Gear Blanks, Centrifugally-Cast, 196.
Germany, Position of the Development of Centrifugal Casting in, 5, 30, 48, 55.
Glare from Cupolas, Prevention of, 248.
Granulated Pig-Iron: The "R.K." Process, Decarburisation of, 231.
Graphite as a Ladle Addition, 370.
Green-Sand Moulds, Large Castings in, 411.
Grey Cast Iron, Ten Years of Progress in, 344.
Grey Cast Iron, with Special Reference to the New B.S. Specifications, Properties of, 199, 267.
Grey Iron, Foreign Standard Specifications for, 375.
Grinding Machine, High-Speed Twin-Drive, 195.
Gunfounders, Bellfounders Turn, 302.
Gypsy Brass Founders, 425.

H

Hand-Press Moulding Machine, New, 189.
Hardness Numbers, B.S.I. Approximate Comparisons of, 284.
Hardness Testing of Chilled Cast Rolls, 320.
High-Silicon Malleable Iron to Drilling, Resistance of, 213.

E. Eng. Lib.

Hot-Tinning of Cast Iron, 122.
Hygiene, Metal Cleaning, 429, 442.

I

Indian Imports of Foundry Products, 150.
Ingot Moulds, Cooling Conditions in, 335.
Institute of British Foundrymen:—
Birmingham, Coventry and West Midlands Branch, Presidential Address, 319.
Branch Activities, Future, 210.
Cast-Iron Sub-Committee, Report of, 199, 267.
District Presidents, 384, 404, 438.
East Midlands Branch, Presidential Address, 337.
Election of New Members, 10, 298.
Falkirk Section, Presidential Address, 327.
Golf Competition at Brocton Hall, 20.
International Foundry Congress Fund, 20.
Scottish Branch, Presidential Address, 355.
Technical Committee, Work of the, 154.
West Riding of Yorkshire Branch, Presidential Address, 301.
Institute of Vitreous Enamellers, Annual Meeting in Birmingham, 397.
Insurance, War Commodity, 418.
Iron and Steel Castings and the Nature of the Materials of the Melt, Relationship between the Quality of, 125.
Iron and Steel Scrap Control, Revised Price Schedules, 350.
Iron and Steel Institute, Statutory Autumn Meeting of, 387.
Iron, Historical Survey of, 441.
Iron-Silicon Alloys, Solubility of Nitrogen in Molten, 371.
Ironfounders' National Committee, 288, 446.
Irons, Cupola Melting of Special, 341.
Iscor Works in 1939, 170.

J

Juvenile Employment Changes, 428.

K

Keith Blackman, Limited, New Works of, 39.
"Kennametal," 442.

L

Ladle Addition, Graphite as a, 370.
Leaded-Bronze Bearing Alloys, Recommendations for Three, 135.
Leaders:—
A.R.P. Castings, 115.
A.R.P. in Industry, 133.
A.R.P. Workers and Injuries, 333.
Commercial Representation, 383.
Concrete Co-operation, 209.
Cupola Practice, 297.
Design of Castings and Foundry Workmanship, 73.
Ductility, 247.
Education for Industry, 179.
Finding the Winner, 19.
Foundry Research, 297.
Gases in Cast Iron, 437.
Hardness Conversion Scales, 421.
New Manager, 37.
New Order, 193.
Planned Research, 263.
Progress Reports, 1.
Psychology of Psychologists, 403.
Reporting Progress, 349.
Rest Pauses and Refreshments in Industry, 53.
Some Selling Problems, 91.
Specifications and Recommended Methods, 365.
Technical Director, 333.
Then and Now, 149.
Toll of Accidents, 115.
Topicalities, 225.
War! 163.
Wartime Developments, 281.
Works Canteen, 317.
Legislation in South Africa, Industrial, 129.
Light-Alloy Melting Practice, 7.
Light Alloys, Effect of Melting Conditions on, 6.
Light Alloys, Influence of Repeated Remelting on the Properties of, 7.
Light-Castings Industry and Rearmament, 16.
Lighting—An Extra Source of Profit, 257.
Lighting for A.R.P., Industrial and Commercial, 326.
Lighting, Wartime Factory, 354.
Liners, Casting Heavy, 246.
Linings for Cupolas, Practical Application of Monolithic, 385.

M

Machine Construction, Cast Iron for, 334.
Malleable Cast Iron, Progress in, 384.
Malleable Cast Iron, Open-Hearth Furnace for Melting, 58, 79, 145.
Malleable Iron, Relation of Carbon Nodule Size and Tensile Properties of, 234.
Malleable Iron to Drilling, Resistance of High-Silicon, 213.
Manganese in British Guiana, 26.
Match-Plate Duplication by Metal Spraying, 185.
Meehanite Research Institute, Annual Meeting of, 22.
Melting Conditions on Gas Unsoundness in Metals, Effect of, 6, 9.
Melting Conditions on Light Alloys, Effect of, 6.
Melting, Efficiency in Crucible, 217.
Melting of Iron, Cupola and the, 299, 367.
Melting of Special Irons, Cupola, 341.
Melting Practice, Light-Alloy, 7.
Melting Special Cast Irons in the Cupola, 359.
Metal Cleaning Hygiene, 429, 442.
Metal Exchange Problems, 318.
Metal Prices, Rally in, 128.
Metal Prospects, Autumn, 74.
Metal Spraying, Match-Plate Duplication by, 185.
Metal-to-Rubber Joints, 304.
Metallurgist, Renaissance of the Steel Casting and the Rôle of the, 124, 126, 137, 216.
Metallurgy, Research in Relation to Steel, 374.
Metals and Alloys used in Making Rubber Tyres, 196.
Metals and Minerals to Belligerents in the War, Accessibility of, 448.
Metals in Wartime, 194.
Microstructure of Cast Irons, Effect of Casting Temperature on the Primary, 321, 339, 356.
Mill-Room Practice, 172, 187.
Minerals, International Control of, 416.
Molybdenum, Tungsten and Titanium together with Calcium Silicide to Cast Iron, Effect of the Addition of, 265.
Monolithic Linings for Cupolas, Practical Application of, 385.
Motion Studies, Making and Application of Industrial Time and, 219, 235.
Motor Drives, Electric, 366.
Moulding Machine, New Hand-Press, 189.
Moulding Ships' Propeller Wheels, 369.

N

Nickel Cast Iron, Raw Materials for Making Low-, 439.
Nickel-Chromium Cast-Iron Alloys, Wear-Resisting, 228.
Nitrogen in Molten Iron-Silicon Alloys, Solubility of, 371.

O

Oil-Sand Cores Need Venting, 259.
Open-Hearth Furnace for Melting Malleable Cast Iron, 58, 79, 145.
Open-Hearth Practice, Steel-Foundry Acid, 255.
Open-Hearth Practice, Steel-Foundry Basic, 229.

P

Patents, Designs, Copyright and Trade Marks (Emergency) Bill, 218.
Pattern-Plate Making, Problems in, 413.
Patternmaking Principles, 440.
Phosphor-Bronze Castings of Heavy Sections, 285, 303, 325.
Pickling Baths, Tantalum Heater Units for, 264.
Pig-Iron and Ferro-Alloys, United States Production of, 189.
Pig-Iron Grading Scheme, 227.
Pig-Iron: The "R.K." Process, Decarburisation of Granulated, 231.
Pipe Merger, Iron and Steel Tube and, 51.
Pipes, Pitting Corrosion of Cast-Iron and Steel, 121.
Post-Congress Tour, 2.
Pouring Devices, Some New, 110.
Power and Electrode Consumption in Electric Furnaces, 174.
Pressure Die-Casting, 258.
Pressure Die-Casting in Aluminium- and Zinc-Base Alloys, 8.
Price Fixing, Factors in, 413, 427.
Priority of Supplies, Principles Governing, 306.
Propeller Wheels, Moulding Ships', 369.

R

Radiography in Iron and Steel Founding, 27, 43, 67.
Randupson Process, Producing a Large Iron Casting by the, 169.
"Rat-tailing" on Flat Castings, 432.
Refractories, Selection and Testing of Cupola, 63.
Remelting on the Properties of Light Alloys, Influence of Repeated, 7.
Research in Relation to Steel Metallurgy, 374.
Research, Organisation and Development of Steel Foundry, 75, 108, 123.
Reservation Ages for Foundry Workers, 404.
"R.K." Process, Decarburisation of Granulated Pig-Iron: The, 231.
Rolls, Defects in Electrically-Melted Chilled, 57, 60.
Rolls, Hardness Testing of Chilled Cast, 320.
Rubber Tyres, Metals and Alloys used in Making, 196.
Running Thin Castings, 351.

S

Sand and Binders, Common Sense with, 78.
Sandbag Revetments, How to Preserve, 358.
Sandontap Moulding Process, 288.
Scale Formation in Compressor Cooling Systems, Suppressing, 408.
Scrap, Collection of, 422.
Scrap, National Campaign for Collection of, 298.
Scrap Metal Problems, 404.
Shot-Blast Practice Mechanised, 424.
Solidification of Castings by Calculation, Control of, 95.
South Africa, Industrial Legislation in, 129.
Specifications for Grey Iron, Foreign Standard, 375.
Spelter, Importance of, 248.
Spraying, Match-Plate Duplication by Metal, 185.
Steel Casting and the Rôle of the Metallurgist, Renaissance of the, 124, 126, 137, 216.
Steel Castings, Basic Electric Practice for, 269, 289.
Steel Castings, Notes on Dry-Sand Practice for, 103, 123.
Steel-Foundry Acid Open-Hearth Practice, 255.
Steel-Foundry Basic Open-Hearth Practice, 229.
Steel-Foundry Practice, Gating and Feeding in, 218.
Steel-Foundry Practice, Notes on, 182, 197, 214.
Steel-Foundry Research, Organisation and Development of, 75, 108, 123.
Stopper Ends, 318.

T

Tantalum Heater Units for Pickling Baths, 264.
Training, Technical, 102.
Thermal Conductivity of High-Duty and Alloy Cast Irons, 56.
Time and Motion Studies, Making and Application of Industrial, 219, 235.
Tinning Cast Iron, 194.
Titanium together with Calcium Silicide to Cast Iron, Effect of the Addition of Molybdenum, Tungsten and, 265.
Training in Great Britain, Foundry Education and, 184, 202.
Tropenas Furnace for Alloy Steels, Electric, 448.
Tungsten and Titanium together with Calcium Silicide to Cast Iron, Effect of the Addition of Molybdenum, 265.
Turnings, Utilisation of Cast-Iron Borings and, 360.
Tyres, Metals and Alloys used in Making Rubber, 196.

U

Unsoundness in Metals, Effect of Melting Conditions on Gas, 6, 9.

V

Venting, Oil-Sand Cores Need, 259.
Vitreous Enamel, Recommended Method of Testing the Acid Resistance of, 395.

W

War Material, Export of, 152.
War Risks Insurance, 210.
Waste Metal Recovery, 194.
Wasters, Elimination of, 389.
Wear-Resisting Nickel-Chromium Cast-Iron Alloys, 228.
Welding a Special Alloy Casting, 256.
Welding Aluminium Castings, 302.
Workmen's Compensation Acts, 134.

Z

Zinc Alloys on Pressure Die-Casting Equipment, Action of Molten, 276.
Zinc-Base Alloys, Pressure Die-Casting in Aluminium- and, 8.
